1. EINFÜHRUNG

Die Idee für NEBROC – die Kooperation in den Meereswissenschaften zwischen dem Royal Netherlands Institute for Sea Research (Royal NIOZ) und vier meeresforschenden Instituten im Land Bremen (Alfred-Wegener-Institut für Polar- und Meeresforschung, Universität Bremen, Max-Planck-Institut für marine Mikrobiologie und Zentrum für Marine Tropenökologie, die alle im Zentrum für Marine Umweltwissenschaften (MARUM) zusammengeschlossen sind) – entstand bei Gesprächen zwischen Minister Dr. Ritzen, Bundesminister Dr. Rüttgers und Frau Senatorin Kahrs im Frühjahr 1996. Auf deren Initiative trafen sich deutsche und niederländische Wissenschaftler und erarbeiteten einen gemeinsamen Antrag, mit dem Ziel über eine enge Kooperation zwischen dem Royal NIOZ und dem MARUM langfristig ein nordwesteuropäisches Center of Excellence zu etablieren. Dieser Antrag, mit ausgewiesenen Kooperationsfeldern in den Bereichen Klimageschichte, Ozeanischer Kohlenstoffkreislauf, Küsten- und Kontinentalhangforschung, Meeresforschungstechnologie und Doktorandenausbildung im Rahmen des "European Graduate College for Marine Sciences" (ECOLMAS) wurde ab dem 1.2.1998 von der NWO und vom BMBF zu gleichen Teilen gefördert. Einer Förderunterbrechung von 2003 bis 2005 schloss sich Deutschland eine weitere Förderphase von 2005 bis 2008 an. In den Niederlanden wird diese Phase noch bis 2010 gefördert.

Seit Beginn der Förderung hat sich NEBROC zu einem aktiven Forschungsnetzwerk entwickelt. Eines der vorrangigsten Ziele von NEBROC ist es, die Entwicklung gemeinsamer Forschungsprogramme zu stimulieren und zu unterstützen. Dabei konnten bereits beachtliche Erfolge beim Einwerben externer Fördermittel, z.B. von der EU, errungen werden. In wenigen Jahren wurden bereits deutliche und substantielle synergetische Effekte durch die Kooperation zwischen dem Royal NIOZ und den im MARUM vereinigten Instituten im Rahmen von NEBROC erzielt.

NEBROC hat sich dabei zu einem Forschungsverbund entwickelt, der durch die Fördermittel von der NWO und vom BMBF strategisch unterstützt wurde. Diese Unterstützung umfasst Personal- und einige Reisekosten, wohingegen die realen Forschungsarbeiten über externe Forschungsprojekte finanziert werden. Dabei spielen die über NEBROC finanzierten Personalstellen eine Schlüsselrolle, indem sie im Rahmen einer engen Kooperation neue Forschungsansätze und

Forschungsprojekte entwickeln und dadurch weitere Mittel für die Forschung eingeworben haben.

Auch in der jetzt abgeschlossenen Förderphase lag der Schwerpunkt der Aktivitäten von NEBROC auf dem Ausbau eines Centers of Excellence für Meereswissenschaften in NW-Europa, die durch „seed funding“ für NEBROC unterstützt wurden.

Die Förderphase, über die hier abschließend berichtet wird, begann am 1.9.2005 und pünktlich zu diesem Termin konnten auf Bremer Seite alle Personalstellen besetzt werden. Für die einzelnen Forschungsfelder sind die folgenden Personen eingestellt worden, die bereits im Antrag namentlich genannt worden sind:

Forschungsfeld A: Dr. Mario Hoppema (0,5 TVL 13)
Ozeanische Kohlenstoffflüsse & Biologische Rückkoppelungen

Forschungsfeld B: Dr. Ingrid Zondervan (1,0 TVL 13)
Neue Proxies und ihre Validierung

Forschungsfeld C: Dr. Jan-Berend Stuut (1,0 TVL 13)
Variabilität des Klimas und Paläoklimas

Forschungsfeld D: Dr. Christian Winter (1,0 TVL 13)
Kontinentalrandprozesse

Forschungsfeld E: Dr. Nils Volkenborn (0,5 TVL 13)
Funktionale Diversität und die Schlüsselrolle einzelner Arten

Die Zusammensetzung der NEBROC-Wissenschaftler, 3 von 5 der in Bremen/Bremerhaven beschäftigten kamen/kommen aus den Niederlanden und 2 der 5 am NIOZ beschäftigten kommen aus Deutschland, zeigt, dass auf dieser Ebene die Deutsch-Niederländische Kooperation und der Austausch bereits fest verankert sind. Frau Dr. Zondervan hat zum 1.1. 2007 eine neue Stelle übernommen. Das Forschungsfeld B wurde seitdem von Frau Dr. Claudia Sprengel vertreten.

Im Verlauf dieser Förderphase hat sich das Scientific Steering Committee von NEBROC insgesamt dreimal (plus einmal Anfang 2009) in Groningen zu seinen regelmäßigen Sitzungen getroffen. Da Groningen auf halben Weg zwischen Bremen/Bremerhaven und Texel liegt, hat sich die Universität Groningen im Verlauf der letzten Jahre als bevorzugter Sitzungsort erwiesen. Im Verlauf dieser Sitzungen wurden jeweils alle wichtigen NEBROC-relevanten Punkte besprochen. Die Einzelheiten dazu sind den beigefügten Protokollen der Sitzungen zu entnehmen. Bei diesen Protokollen, wie auch bei den weiteren Berichtsdokumenten, handelt es

sich im Rahmen von NEBROC konsequenterweise um bilaterale Papiere, die dementsprechend in English verfasst sind. Nach dem ebenfalls noch in Deutsch verfassten Erfolgskontrollbericht sind dann noch die folgenden Dokumente (in Englisch) beigefügt:

18. Kurzfassung Mit dem Ziel die deutsch-niederländische Wissenschaftskooperation auf dem Gebiet der Meeresforschung zu intensivieren und zu stärken wurde von 1998 bis 2003 und von 2005 bis 2008 das Kooperationsvorhaben NEBROC auf deutscher Seite vom BMBF und vom Land Bremen und auf niederländischer Seite von der NWO (noch bis 2010) gefördert. Beteiligt am NEBROC-Verbund sind neben dem niederländischen Institut für Meeresforschung (NIOZ) auf Texel die meeresforschenden Einrichtungen im Land Bremen unter Federführung des MARUM – Zentrum für Marine Umweltwissenschaften an der Universität Bremen. Neben der Fortsetzung von internationalen Projekten, die in der ersten NEBROC-Förderphase begonnen oder initiiert wurden, konnten im Berichtszeitraum (2005 – 2008) zehn weitere EU- und ESF-Projekte mit bilateraler NEBROC-Beteiligung angefangen, bzw. erfolgreich beantragt werden. Diese sichtbare Positionierung der NEBROC-Partnerinstitute auf internationaler Ebene hat auch dazu beigetragen, NEBROC als virtuelles NW-Europäische <i>Center of Excellence</i> für Meeresforschung zu einem gefragten Partner für alle größeren Meeresforschungsinitiativen zu machen. Eine weitere herauszuhebende NEBROC-Erfolgsstory stellen die ECOLMAS-Kurse im Rahmen der Doktorandenausbildung dar. Dieses europaweit bekannte und anerkannte Doktorandenausbildungsprogramm bietet jedes Jahr eine Vielzahl von Kursen an, an denen neben Doktoranden aus Bremen/Bremerhaven und von Texel auch Nachwuchswissenschaftler aus anderen europäischen Ländern teilnehmen.

18. Abstract Aiming at intensifying and strengthening the German-Dutch science collaboration in the field of marine sciences the cooperation project NEBROC has been funded from 1998 to 2003 and from 2005 to 2008 by the BMBF and the State of Bremen on the German side and by NOW (until 2010) on the Dutch side. Partners in the NEBROC cooperation are the Royal Netherlands Institute for Sea Research (NIOZ) and the marine science institutions in the State of Bremen led by the Center for Marine Environmental Sciences (MARUM) at the University of Bremen. In addition to the continuation of international projects that have been stated or initiated during the first NEBROC funding phase, during the reporting time (2005 – 2008) ten additional EU- and ESF projects with bilateral NEBROC participation have been begun or have been successfully applied for. This increase in visibility of the NEBROC partner institutions on the international level contributed to make NEBROC as a virtual NW-European Center of Excellence in Marine Sciences to a wanted partner for all major initiatives in marine research. Another remarkable NEBROC success story are the ECOLMAS courses as part of the PhD student training programme. This programme is in the meanwhile famous in Europe and offers every year a variety of training courses, in which PhD students from Bremen/Bremerhaven and Texel as well as from other European countries (and even from overseas) participate.
